## VOLUME 2, 1992

## SUBJECT INDEX

Adulteration, 1
Allybenzocyclobutene, 83
Alumina ceramics, 191
Aquatic plants, 89
Arterial prosthesis, 171
Artificial bone, 33
Artificial skin, 123, 127
Attenuation per wavelength, 19, 155
Attenuation, 79

Beans, 89
Benzocyclobutene, 83
Biocompatibility, 51
Biomaterials, 203
Biomedical applications, 7
Bone fixation, 71
Bone marrow cell, 191
Bulk mechanical work, 139

Calcium phosphates, 115
Cavity preparation, 41
Chemical constituents, 79
Chronic experiment, 139
Compliance mismatch, 171
Corrosion rate, 51
Corrosion testing, 107
Creep, 41, 133
Curing agent, 83
Cytotoxicity, 203

Dental amalgam, 41
Doped, 185

Electrochemical properties, 107
Elongation, 203
End-to-end anastomosis, 171
Environment, 89
Eutrophication, 89

Finite element method, 41
Flexibilized gelatin film, 123
Flow visualization, 171
Fluorochrome study, 191
Food systems, 1
Force-relaxation, 133

Gelatin film, 127
Glass ceramics, 33

Hardness, 79
Hepatic tissue, 133
Heterotopic bone formation, 191
Hydrogen bubble method, 171
Hydroxyapatite, 115, 185
Hypersensitivity, 51

Implants, 115
Indentation technique, 133
Inelastic behavior, 33
Infrared thermography, 7
Irradiation, 203

Kidney stone, 79
Kinetics, 127
Knot property, 71

Left ventricular assist device, 139
Liquid crystal thermography, 7
Lithotripsy, 79

Marginal fracture, 41
Mechanical testing, 71
Microwave thermography, 7
Model, 123
Moire method, 133

Nickel dissolution, 51
Nickel toxicity, 51
Nitrates and phosphates, 89
Non-toxic, 83
Nondeformation, 133

Orthopedics, 107
Osteogenesis, 191

Phase velocity, 19, 155
Polarization, 51
Pollution, 89
Poly(vinyl alcohol), 71
Polyolefins, 83
Porous metals, 107
Porous surface, 51
Potassium, 185
Potentiodynamic behavior, 107
Processed milk cream and vegetable oil, 1

Regional mechanical work, 139
Release, 127

Shape memory effect, 51
Superelasticity, 51
Suture material, 71

Tensile strength, 203
Thermography, 7
TiNi alloys, 51
Transducer, 1
Transmission line theory, 19

Ultrasonic displacement meter, 139
Ultrasonic technique, 1
Ultrasonic velocity, 79

Viscoelastic tubes, 19, 155

Wastewater, 89
Wave propagation, 19, 155

## AUTHOR INDEX

Akutsu, T., 139
Artioli, E., 19, 155
Asaoka, K., 41
Azuma, T., 89

Baquey, Ch., 203
Barbié, C., 203
Bareille, R., 203
Benino, Y., 33
Bordenave, L., 203
Brun, J. L., 203

Chowdhary, P. R., 107

Dhawan, J. B., 79

Erhan, S., 123, 127

Farona, M. F., 83
Fishback, T. L., 83
Fukuda, S., 139

Hayashi, K., 139, 171
Hirao, K., 33

Ikada, Y., 71
Ikeuchi, K., 71

Kaleem, K., 123
Karlsson, K. H., 185
Kawano, F., 41
Koerten, H. K., 191
Kumar, A., 1

Lefebvre, F., 203
Liu, Y. P., 133

Matsumoto, T., 171
McMillin, C. R., 83
Miettinen, J., 115
Mii, Y., 71
Miyazaki, S., 51
Motobu, H., 89

Naiki, T., 171
Nakamura, T., 139
Nakatani, T., 139
Niemi, L., 115
Niiro, M., 89
Nithianandam, V. S., 123
Noda, H., 139
Nordström, E. G., 115, 185

Ohgushi, H., 191
Okumura, M., 191
Oshida, Y., 51

Rouais, F., 203

Sachdeva, R. C. L., 51
Seki, J., 139
Shimaya, M., 71
Shinde, B. G., 123, 127
Singh, V. R., 1, 79
Soga, N., 33

Takakura, Y., 191
Takano, H., 139
Tamai, S., 71
Tomita, N., 71

Ursino, M., 19, 155

van Blitterswijk, C. A., 191

Wang, B. C., 133
Wang, G. R., 133
Warren, L. D., 107

Yan, D. H., 133
Yang, P. P. T., 7
Yang, W.-J., 7
